TECHNICAL & PROJECT DETAILS

Weather forecast:

A weather forecast website using an API allows users to obtain up-to-date weather information for a particular location. The website utilizes an Application Programming Interface (API) to retrieve data from a weather service provider and present it to the user in a user-friendly format.

Instagram clone:

An Instagram clone front-end aims to replicate the core features and visual elements of the popular social media platform, Instagram. The front-end of the clone is responsible for providing users with an interface that closely resembles the original Instagram app, allowing them to perform similar actions and interact with the platform in a familiar way.

Criminal Database Management System :

The crime management system can help in storing the records related to the criminals, cases, complaint record, case history and so on. This can allow a person to enter or delete the records if necessary.

CRUD Operation Using Angular, Spring Boot and MySql

Coffee Shop App Design using Ui Ux Design

Nft card Web Design using Ui Ux Design
